## EDUCATION

---

<b>Southern University of Science and Technology</b> M.Sc. in Electronic Science and Technology	<i>Sept. 2021 - June 2023(Expected)</i> Shenzhen, China
<b>Southern University of Science and Technology</b> B.E. in Mechanical Engineering	<i>Sept. 2015 - June 2019</i> Shenzhen, China

## PUBLICATIONS & PATENTS

---

### Patents

- **Yanglang Yuan**, Jiahui Zhang, Xiaoyu Zhang, Fan Zhou, Yajun Wang, Hui Li, Haijiang Wang. Fuel cell bipolar plate and fuel cell: CN, 110459780A[P]. 2019-11-05.
- **Yanglang Yuan**, Jiahui Zhang, Xiaoyu Zhang, Fan Zhou, Yajun Wang, Hui Li, Haijiang Wang. Fuel cell bipolar plate and fuel cell: CN, 210429963U[P]. 2019-07-25.

## RESEARCH EXPERIENCES

---

<b>Intelligent Manufacturing Lab at SUSTech</b> <i>Advisor: Prof. Yiming Rong</i>	July 2021 - Present Shenzhen, China
--	--

- **Researching for Customer-Manufacturer(C2M)**  
Data driven intelligent manufacturing system;  
C2M manufacturing system model with universality and completeness;  
3D printing sneakers based on C2M scene.

<b>Shenzhen Key Laboratory of Hydrogen Energy</b> <i>Advisor: Prof. Haijiang Wang</i>	June 2017 - June 2019 Shenzhen, China
--	--

- **A Bipolar Plate Design for Fuel Cell**  
Mechanical structure design of a novel bipolar plate for fuel cell unmanned aerial vehicle (UAV);  
Simulated in SolidWorks and COMSOL for the static and dynamic analysis.
- **A Controlling System for Fuel Cell**  
Designed the control logic and methods & controller of the fuel cell system;  
Designed the temperature and voltage patrol detection system of Fuel Cell.  
Thesis topic: Controlling System of the fuel cell in unmanned aerial vehicle (UAV)

<b>Seoul National University - SUSTech Research Program</b> <i>Advisor: Prof. Keyang Tang</i>	Dec. 2017 - Jan. 2018 Shenzhen, China
--	--

- **International Winter Undergraduate Research Experience**  
Worked in mixed teams with Seoul National University students to complete specific research tasks;  
Analysis on the development of intelligent manufacturing industry;  
Brief hypothesis of integrated system for design, manufacture and maintenance of shared bicycle.

<b>Robotics and Autonomy Lab at Tsinghua University</b> <i>Advisor: Prof. Chenglong Fu</i>	June 2017 - Aug. 2017 Beijing, China
---	---

- **Summer Undergraduate Research Project**  
Participated in the design and manufacturing of robot Bluetooth communication controller;  
Other advanced knowledge in Robotics.

## Formula Student Electric China Program

*Advisor: Prof. Yiming Rong*

2016 - 2017

*Shenzhen, China*

- **The Controlling System of Electric Racing**

*Jan. 2017 - Aug. 2017*

Designed the control logic and methods of the electric racing;

Built the high voltage and low voltage circuits of the racing.

- **Battery Management System(BMS) of Electric Racing**

*June 2016 - Jan. 2017*

Research on control strategy of battery management system;

Designed and built the temperature and voltage detection circuit of battery management system.

## TEACHING EXPERIENCE

---

### Advanced Manufacturing Systems

Feb. 2022 - June 2022

*Teaching Assistant*

*Shenzhen, China*

- The primary goal of this course is to impart to the student an understanding of advanced systems for the production of mechanical components using the latest technologies and methods and to enable the student to analyze systems for the production of mechanical components using modern advanced processes and technologies. Discussions are presented related to the system integration of computer-aided design (CAD), computer-aided engineering (CAE), computer-aided manufacturing (CAM), robotics, material resource planning, tool management, information management, process control, quality control, etc.

### Awareness Practices of Manufacturing Engineering

Sept. 2021 - Jan. 2022

*Teaching Assistant*

*Shenzhen, China*

- This is an awareness practice course to gain some basic knowledge of fundamental manufacturing principle and methods through learning and operating typical manufacturing equipment, such as Numerical Controlled (NC) machine tools, measurement devices, additive manufacturing (3D printing) machines, etc. Students are expected to establish an understanding of basic manufacturing methods and operations as well as the concept of quality. It is a foundation for further learning in related engineering disciplines.
- Responsible for preparation of equipments, data analysis, and presentation of results and conclusions of the students' course projects.

## SKILLS

---

### Certificate

GCDF

### Programming

Proficient: MATLAB, Plant Simulation; Intermediate: C/C++, Java

### Technical Tools

LATEX, Solidworks, 3D-printing, CAM, Altium Designer, etc

### Language

Chinese, Cantonese, English

## HONORS AND AWARDS

---

Excellent Teaching Assistant, SUSTech

2022

Employee of the Year, SUSTech

2021

Outstanding Graduation Thesis, SUSTech

2019

First-Class Honors Graduate of Zhicheng Residential College, SUSTech

2019

Self-improvement Star of Zhicheng Residential College, SUSTech

2019

National Encouragement Scholarship, China

2018

Outstanding Leadership of Zhicheng Residential College, SUSTech

2016 - 2018

Winning Award of Formula Student Electric China

2017
